Portfolio and C.V

Ultan Rooney
Product Designer

Cover Letter

Dear Sir/Madame,

Thank you for taking the time to read my C.V,
I hope you find it interesting and I receive an opportunity to work for your company. I've taken a look at what qualities of a designer that you are looking for and believe that my expertise meets your demands. I'm submitting this C.V in response to that and hope you agree with me.

My name is Ultan Rooney and I'm a graduate product design student from the Institute of Technology Sligo. I haven't had a chance yet to get some real field experience but I'm passionate designer ready to enter the field and make a name for myself. I want to make an impact on peoples lives and make design decisions that truly improve the wellbeing of everyone who uses the products or services I develop. I have a large variety of skills many of which are not listed in my C.V or portfolio from my study into software development and technical graphics.

I hope you consider me for a position to your company as I believe I will be a great asset to the team, thank you again for taking the time to look over my work and I hope to hear back from you.

Sincerely,
Ultan Rooney

Ultan Rooney

Product Designer

My name is Ultan Rooney and I’m a graduate product designer from the Institute of Technology Sligo. I love researching and developing an understanding of the needs of people, then responding with innovation, idealisation and accessibility in mind to ensure the products, services or tools they need come with maximum benefits to the consumers.

About me:

Interests: I really enjoy idealisation when I’m designing, that sudden spark that happens in my mind when everything fits into place all of a sudden. The adrenaline rush when I become invested in my work, becoming thrilled at where my design could go and who will benefit from its inception.

Hobbies: Outside of design I really enjoy music, especially 80s tunes. I’m into lore focused gaming with intricate plots and stories that captures my imagination and creates a deep connection between the player and the story. For activities I like to cruise on a skateboard or jogging, tuning out the world around me and living in the moment.

Expertise:

Achievements: I have received a shortlist and commendation from a product design competition which was collaborated by W2W, Perch and Orangebox. I developed a privacy screen known as Onyx, which was a portable OLED monitor as thin as fabric that could fit in a common schoolbag which helped create a private environment for the nomadic worker.

Skills: I’m proficient in the following; UX Design for apps and websites, Illustrator and Photoshop for art and graphical work. I have worked with modelling using SolidWorks and Maya. I’ve rendered products using KeyShot with prototype development. Freehand and Technical sketching throughout my course and school. I’m also experienced in marketing and presentations, literature, mathematics and some coding. Customer service from working as waitstaff and much more!

Education:

BSc: Games Development 2016-2018

Ba: Creative Design 2018-2020

Subjects: programming, Web & App Development, Maths, Illustrator and Photoshop.

Video and Animation, Law, Solidworks, Rendering, Literature and Writing, Business, Marketing

Work and Employment

Job Title: M&E Waiter
Employer: Radisson Blu Hotel
Employed: Part Time
Address: Rosses Point, Co. Sligo
Dates: August 2017 - September 2019

Duties: Taking orders, Serving Food, Clearing Tables, Buffets, setting up banquets and office spaces, polishing cutlery & glasses
Organising Stage Pieces, Furniture, Wall Dividers & Kitchen Equipment

Description:

I’ve had a great experience working at the Radisson hotel with managers Pawel Kruk and Martina Haron. They taught me lots of skills in customer service and I had a very pleasant experience working alongside them as a Waitstaff. Being part of many of the events was very exciting while working there especially the Cannonball run and business meetings which helped create connections with local enterprises and companies in Sligo and also across Ireland.

Other Experience:

Job Title: Construction
Employer: Family
Employed: Fulltime
Dates: July 2019 - September 2019

Duties: Demolition (Taking down stone walls, dry walls, Electrics and Plumbing), Mixing Cement, Setting up Scaffolding, Moving Concerete blocks, building walls, Moving materials (Sand, Stone, Cement, Water etc.)

UI & UX Development

Onyx

1

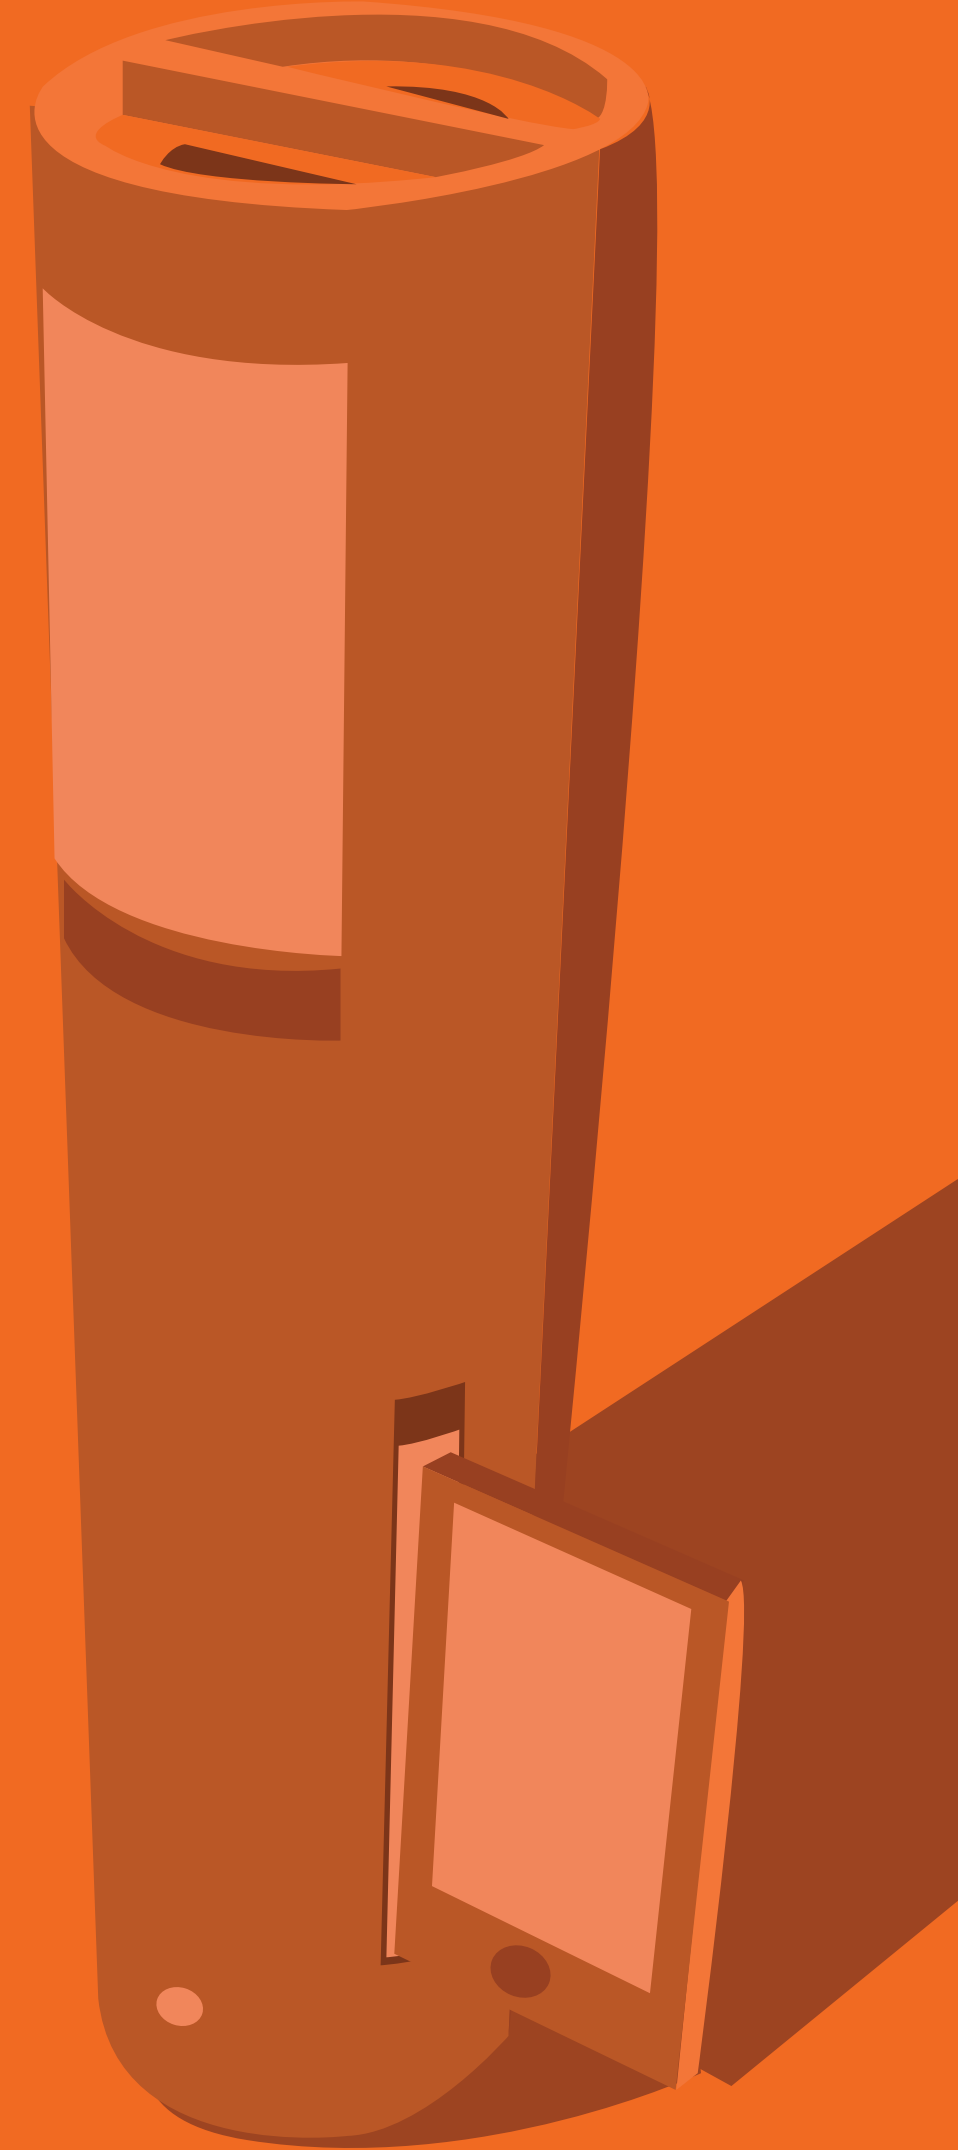

About:

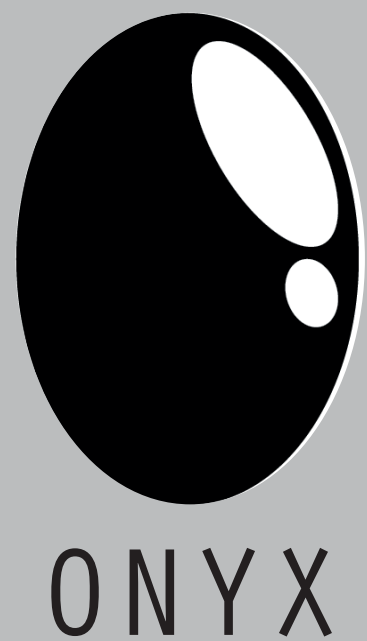

Onyx takes advantage of OLED Technology to create a HD monitor that can fit in your bag for the Nomadic Worker.

Onyx can track weather and time with a dayplanner to help you keep on track of things while travelling for work.

Achievement

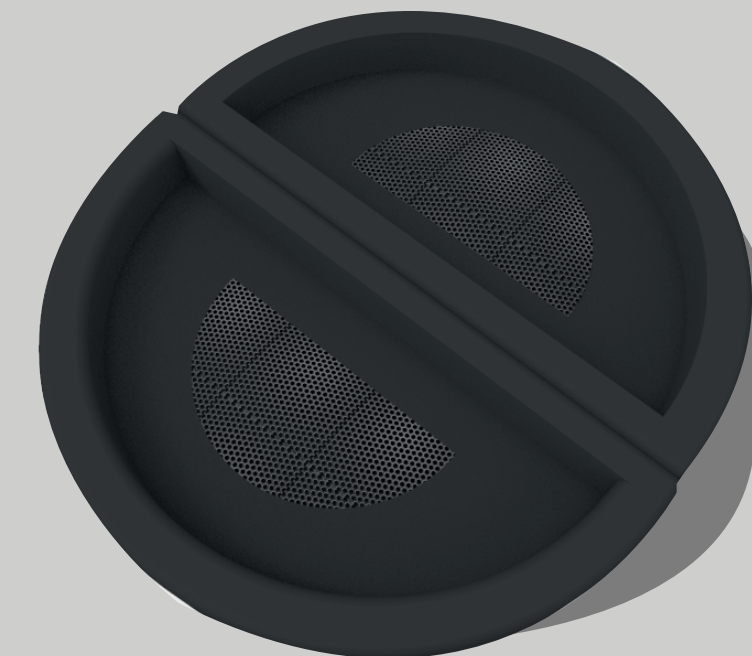

Commended by W2W, Perch and Orangebox Competition in 2018

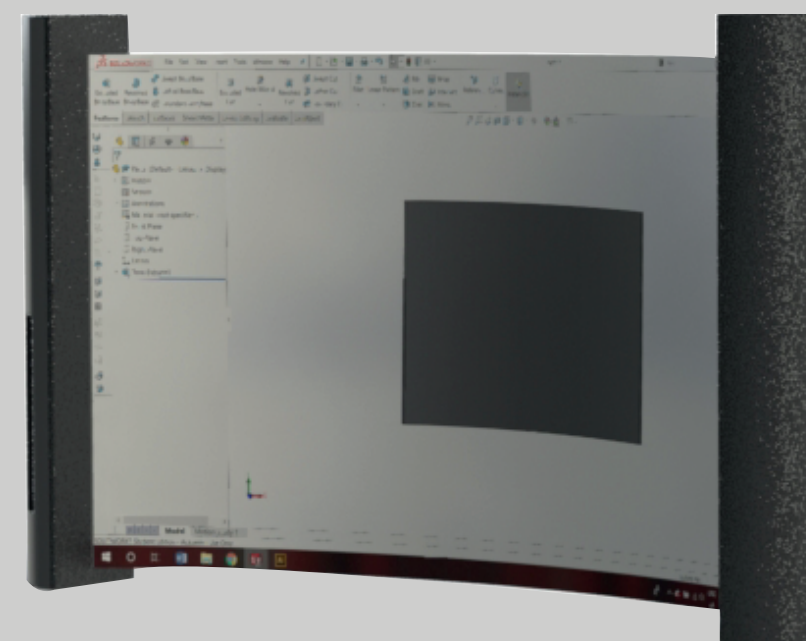

Onyx is an OLED monitor
which doubles as a monitor
for the nomadic worker

Fice

2

About:

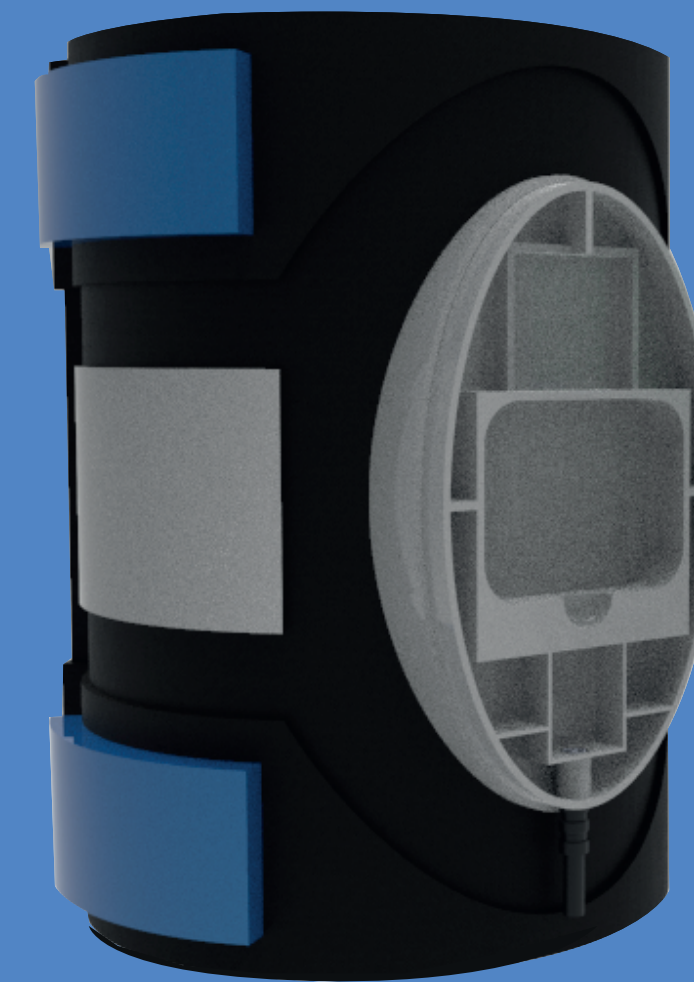

Adopting thermotherapy and cryotherapy into its design FICE is a kneeband which heats and cools down sections of the body.

It is used to treat forms of Arthritis which can have its symptoms reduced by the application of heat and cold.

Fice

Featuring Bluetooth connectivity, and AI monitoring to provide you with fast acting relief against joint pain.

Back

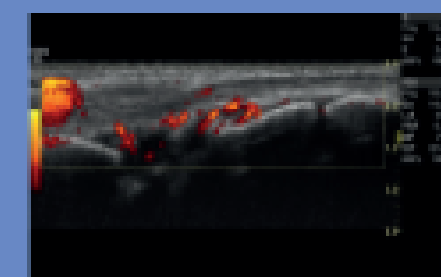

IR Imagery

Below we can see a live image of your knee while FICE is strapped to it. You will notice the strong Red and White patches which can be seen. This is an increase in body temperature which is onset due to the inflammation you are experiencing.

The AI in the FICE unit can detect this inflammation and based on the severity it will process and prescribe a recommended treatment to reduce the inflammation.

The second image here is an Ultrasound of your knee. Sensors built into the FICE unit is capable of tracking inflammation and damage of the Synovial gland. The bright red blotches seen in this image is known as synovitis which is a symptom that arthritis sufferers experience.

About:

Gov.Vote is a conceptual app which is intended to be used by the Irish Government for modernising voting.

It's main goal is to bridge the gap between the voting process and technology and improve accessibility to the election process.

Vote

GOV.Vote

GOV.Vote is all about reaching out to the smaller communities in Ireland who don't have access to polling booths. Also good for our new young voters by offering a new attractive way to vote anytime and any place straight from your Smartphone or Tablet.

Virso

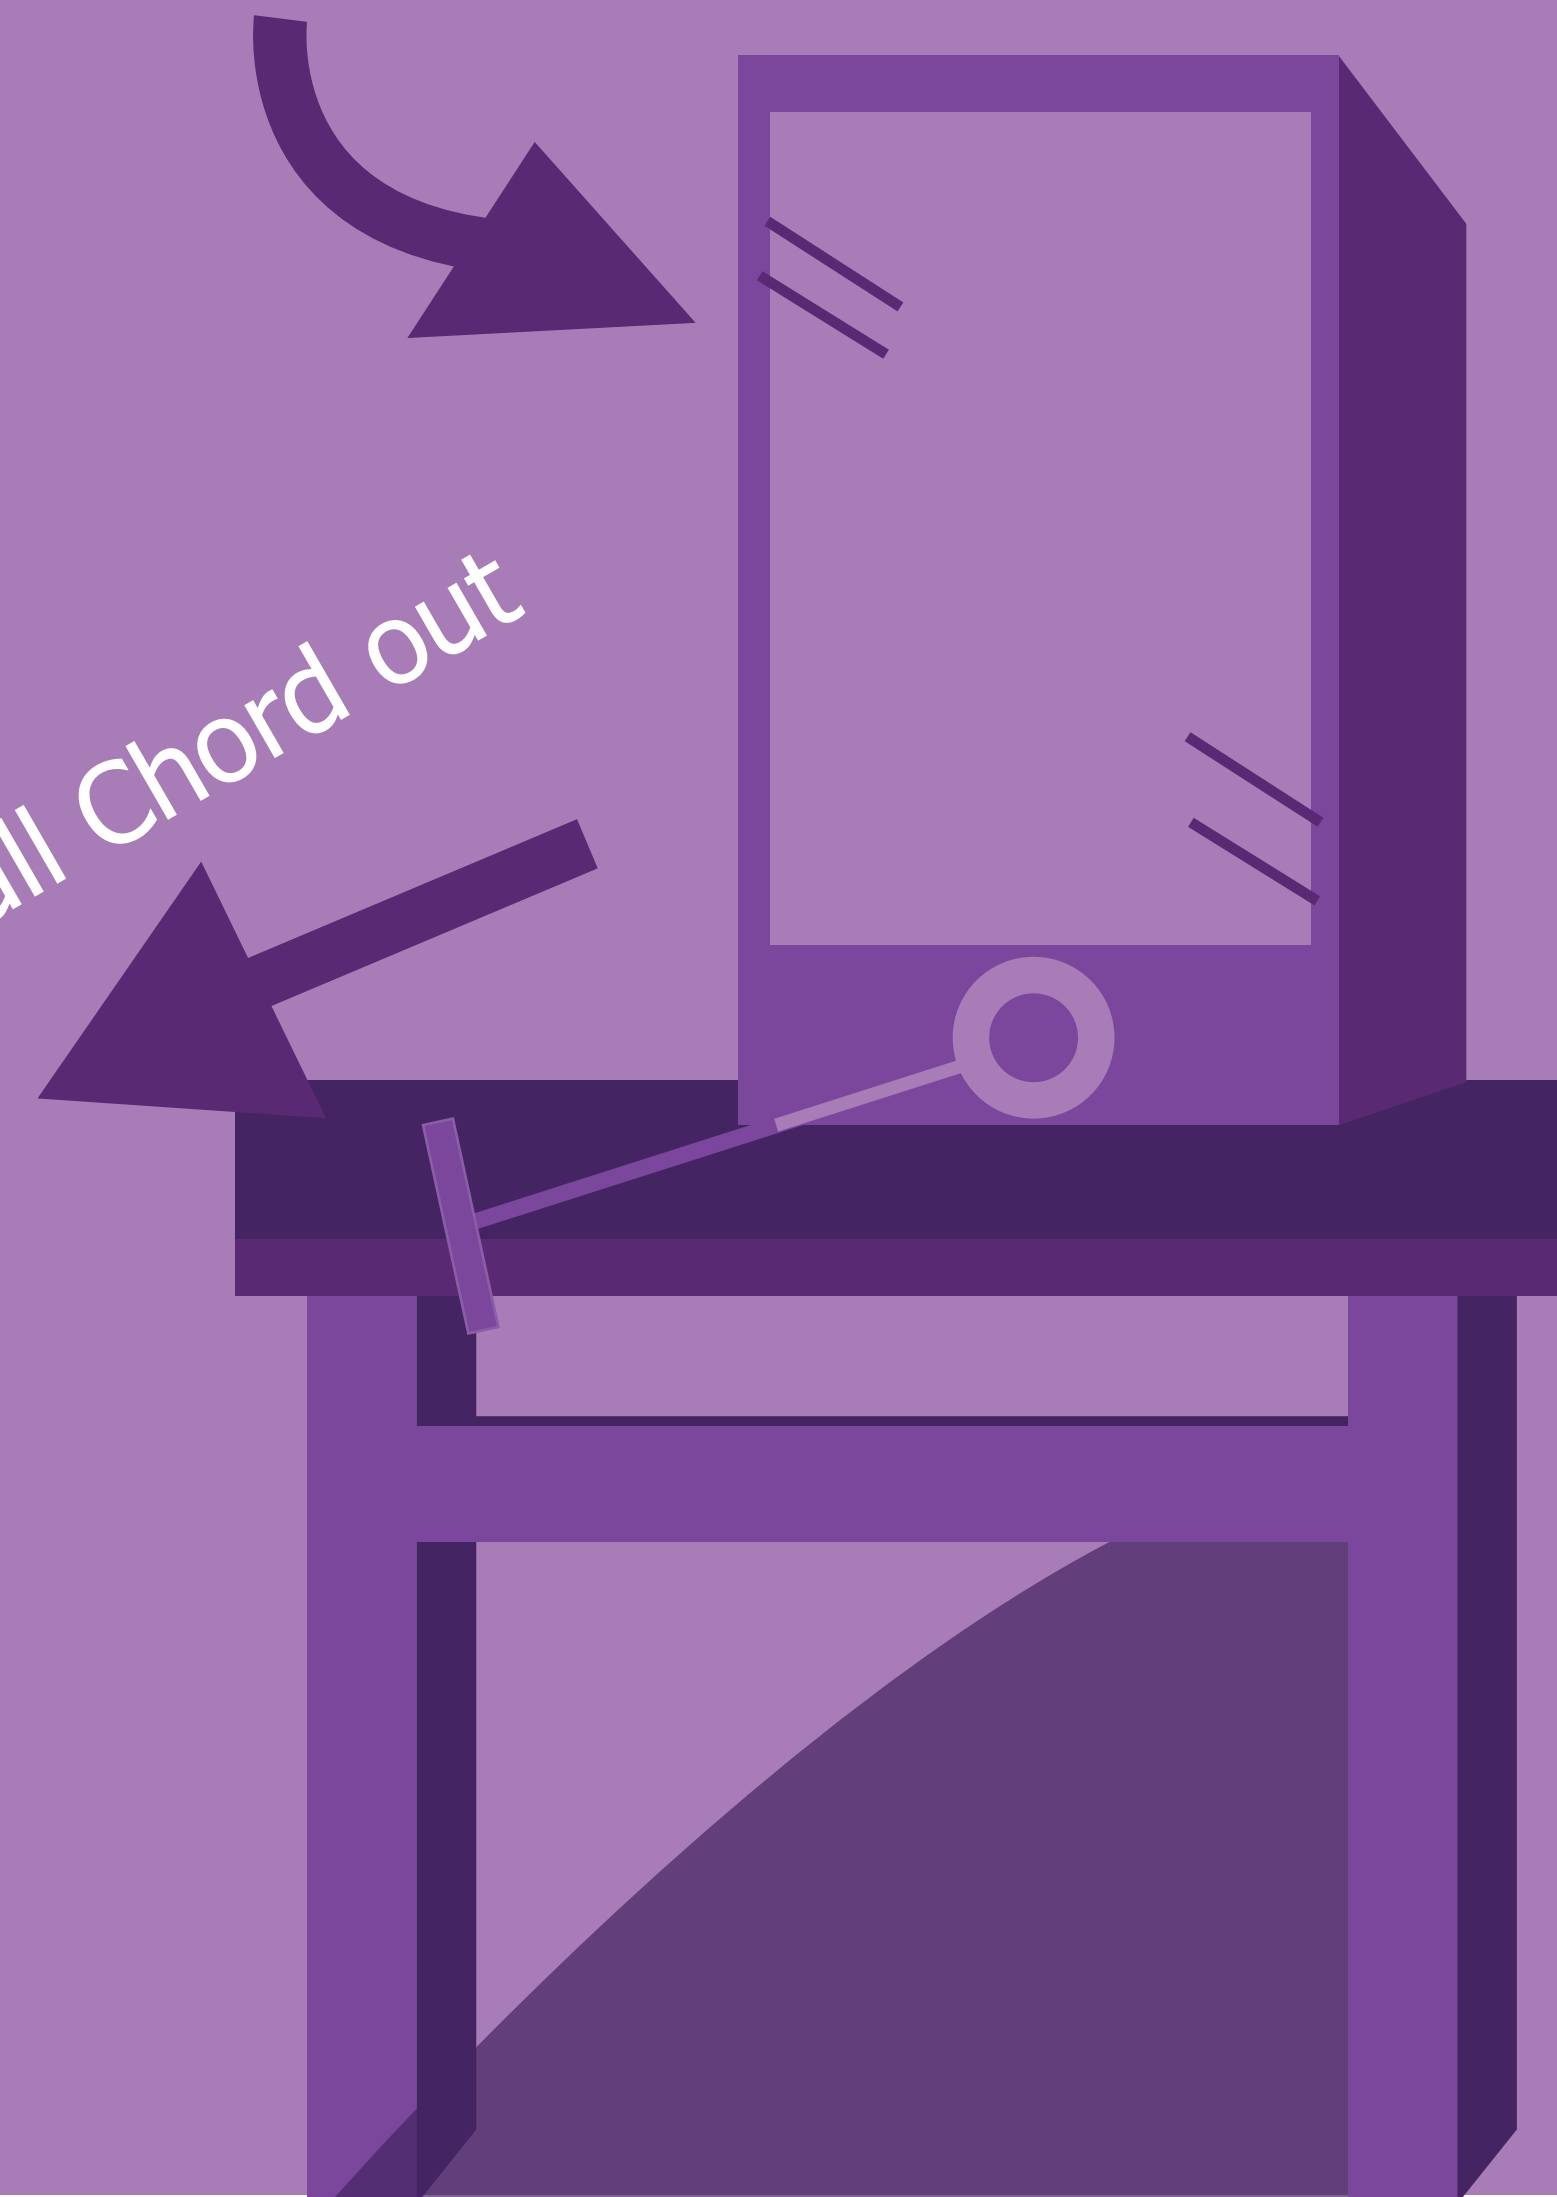

4

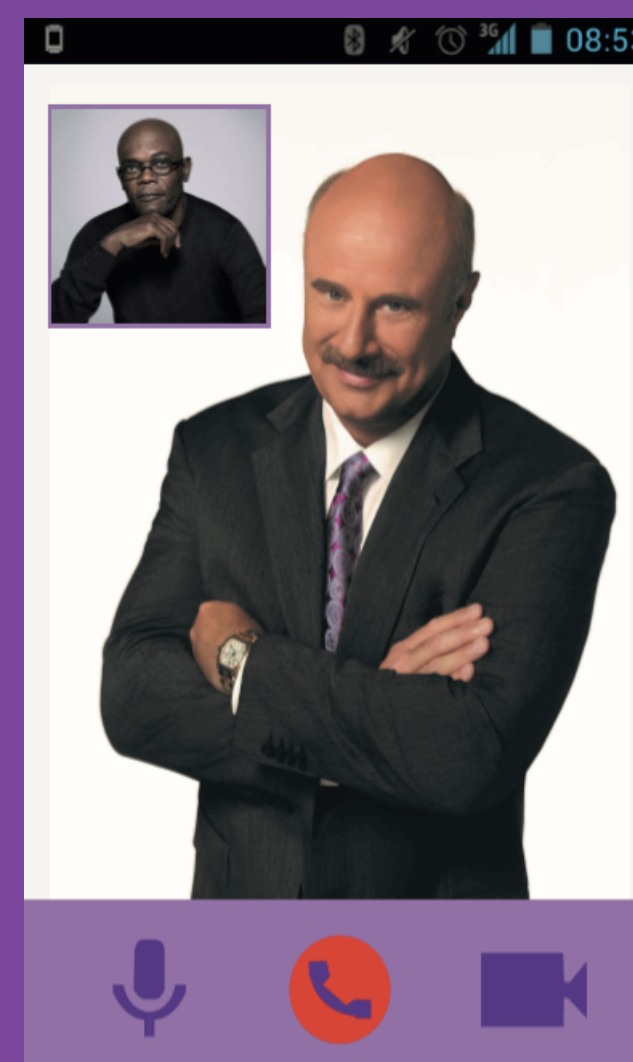

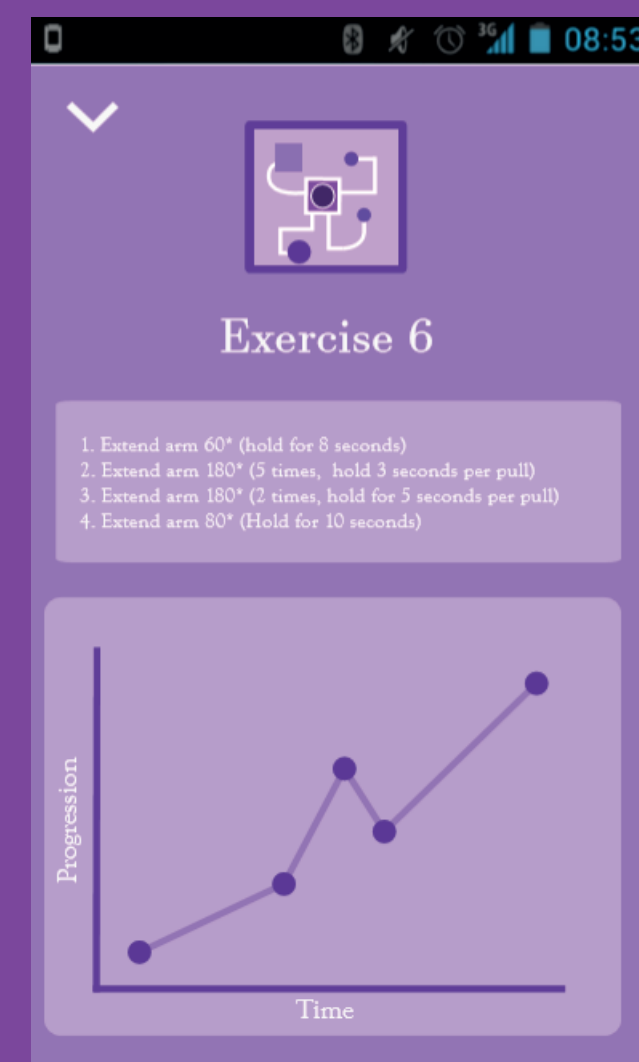

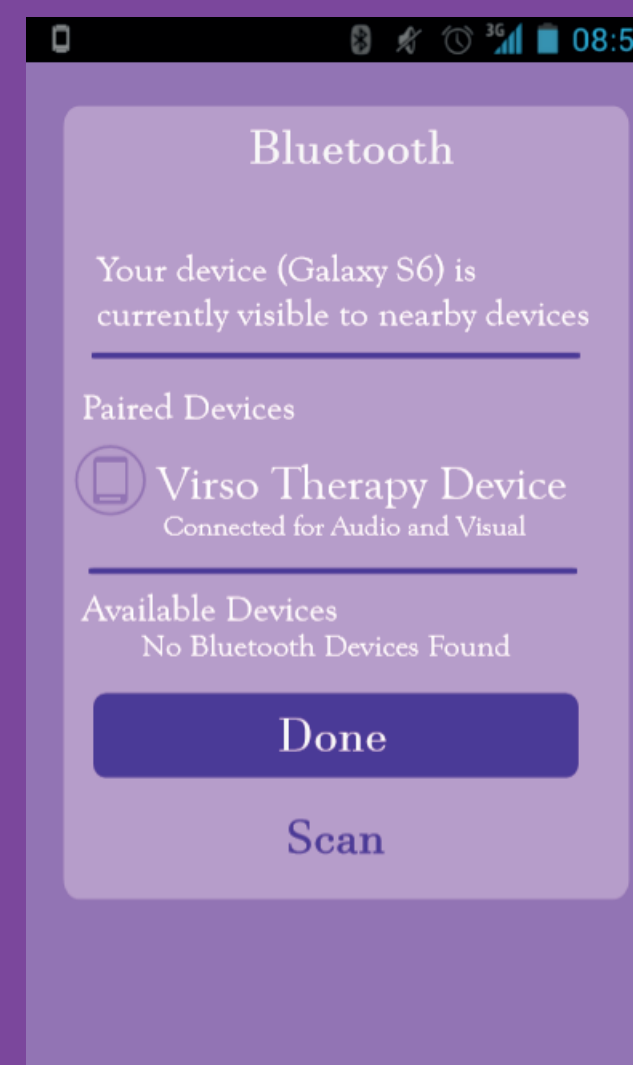

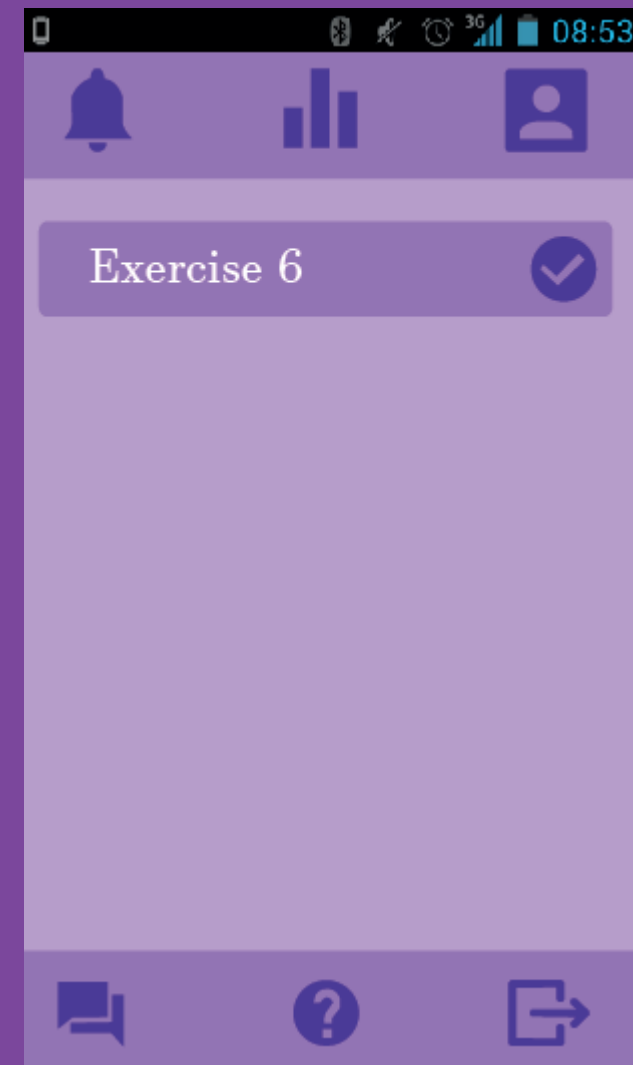

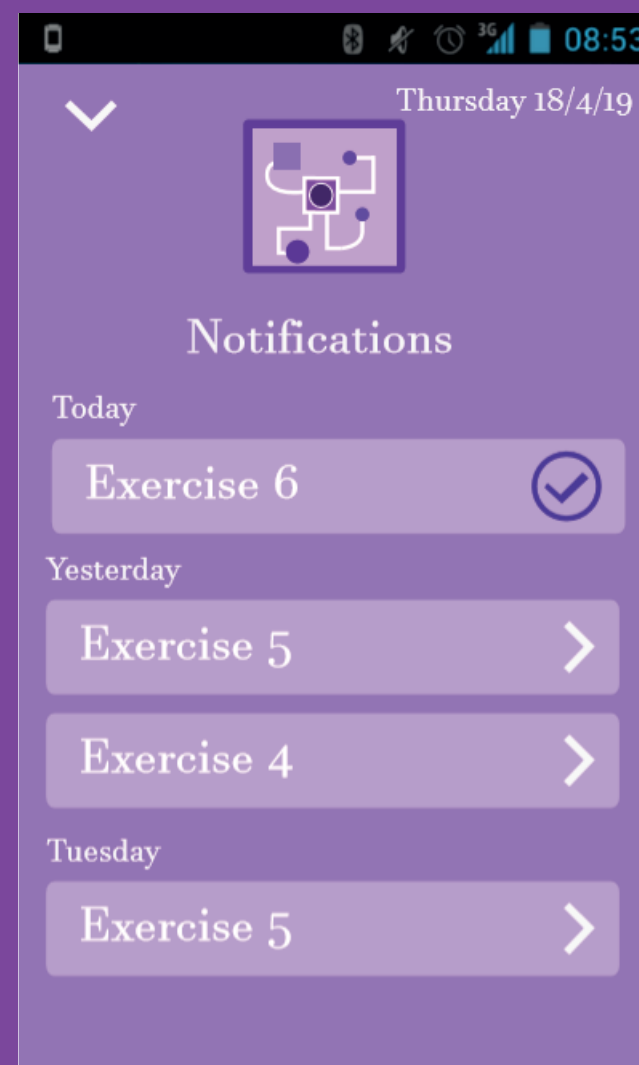

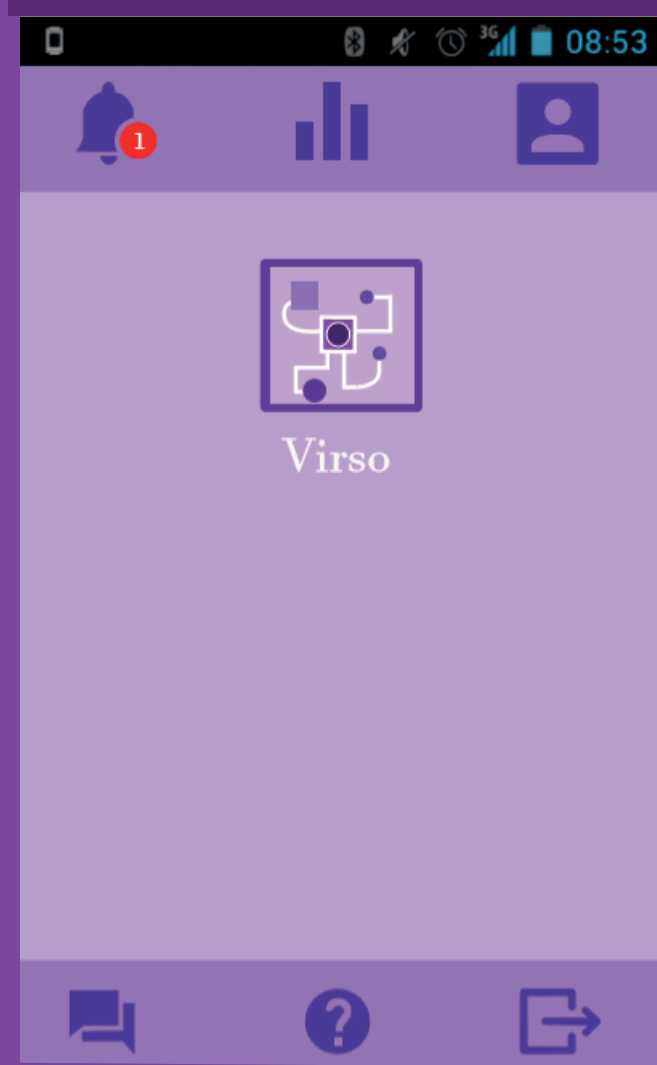

About:

Virso is a private product currently which is used to help patients of stroke recover using the virso therapy stretcher. It takes advantage of “plasticity” of the brain to help stroke patients recover and build muscle strength in their weakened arms. The app tracks your progress as you work.

Amare

5

About:

Amare was one of my early designs I created that received a lot of positive remarks so i've included in my portfolio for you to see. It's about Luxury and style for the high end consumer.

A unique and personalised experience!

Love Tea
Love Coffee

P.O.S

6

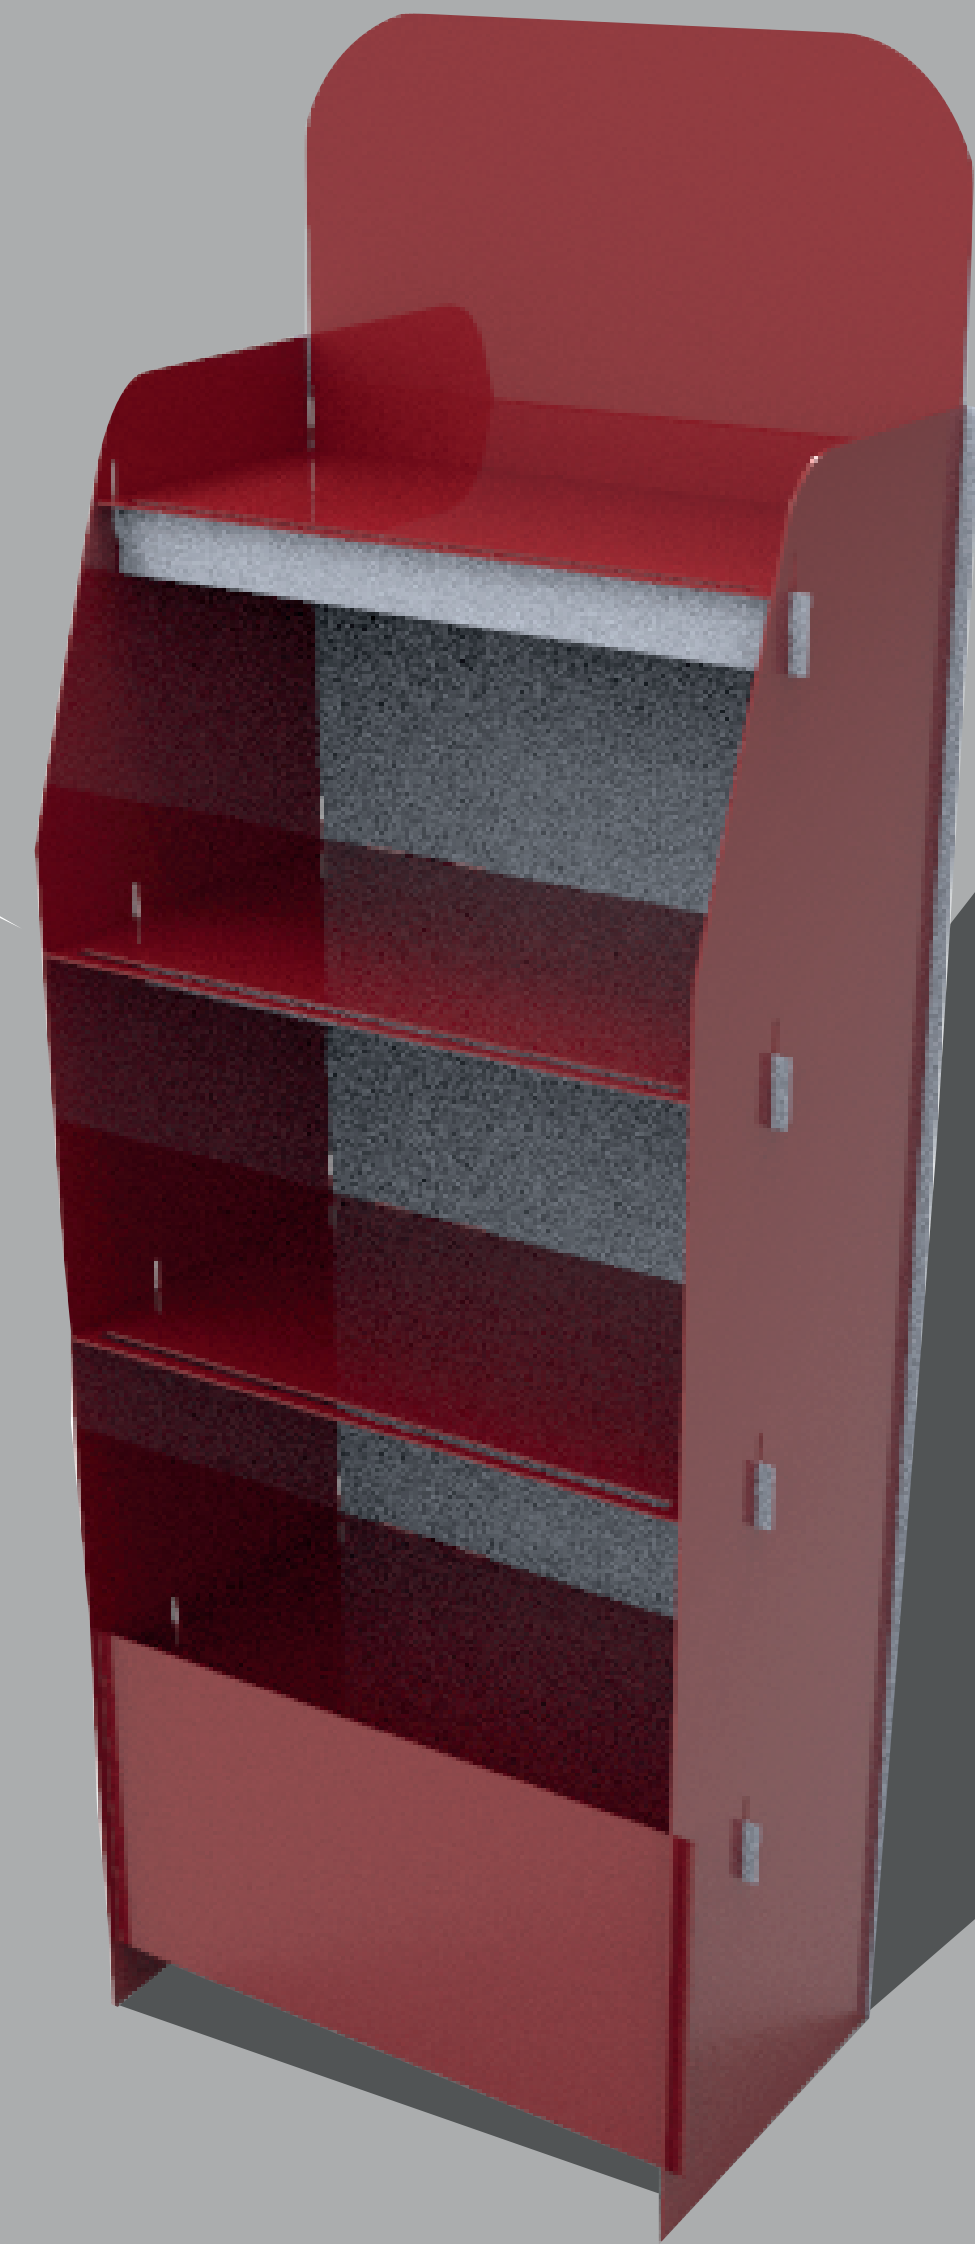

About:

This POS stand was created to challenge my industrial side of Design. It's crafted using 5mm PVC and was designed to help out a marketing company that wanted a quick pop up stand that could be built in under 5 minutes.

The P.O.S. Box is sturdy and lightweight with easy to pop-in slots. Thanks to it being made from PVC it's completely waterproof perfect for shops and all types of businesses.

Thanks

More Content on the way

Thanks for reading through my portfolio, as time goes on I hope to update it and consistently make improvements to the pieces presented in it and also look into adding new designs with more variety and style. If you have any questions feel free to contact me!
