**GPA: 2.1**

**Subjects:** Law, Marketing, Sketching, Prototyping, Business Planning, Visual Media, Design Principles, SolidWorks

**BSc in Games Development(Cert): 2016-2018**

**Subjects:** C# Programming, Maya, HTML5, Maths, Systems & Networking, Photoshop, Personal Development, Web Design

### Employment:

**Employer:** Radisson Blu Hotel

**Dates:** 2017 – 2019

**Job Title:** M&E Waiter

I worked in coordination with staff and management to organise weddings and functions, preparing the room and serving guests. Occasionally exciting events happened such as the Cannonball run which was a great opportunity to make connections.

### Achievements:

During 2019 I developed Onyx, a privacy screen which is intended to be used within open-plan office spaces and public areas. I was commended by Perch, Orangebox and W2W for my project at a symposium in Dublin.

### About Me:

**Interest and Hobbies:** Outside of work I really enjoy improving my design skills and making improvements. Each year since 2019 Eindhoven hosts the Dutch Design Week which I've attended for 2 years running now. The incredible amount of work developed by other people in the industry was overwhelming and enjoyable.

I love developing an understanding of the needs of people, then responding with innovation and accessibility in mind to ensure the products and services come with maximum benefits to the consumers.
